	Mobile app testing peculiarities checklist			
	Cross-platform testing			
No	Description	Passed/Failed	Comment	
1.	The app behaves as designed/desired on different operating systems:		Selected based on the mobile operating system market share worldwide dated 18 September 2023 (https://gs.statcounter.com/os-market-share/mobile/worldwide)	
	Android			
	iOS			
2.	The app behaves as designed/desired on different operating systems' versions: Android:		Selected based on the mobile &	
			tablet Android version market share worldwide dated 18 September 2023 (https://gs.statcounter.com/os -version-market- share/android/mobile- tablet/worldwide)	
	13.0			
	12.0			
	11.0			
	10.0			
	9.0 Pie			
	8.0 Oreo			
	iOS:		Selected based on the iOS version market share worldwide dated 18 September 2023 (https://gs.statcounter.com/io s-version-market-share)	
	iOS 16.6			
	iOS 16.5			
	iOS 16.3			
	iOS 16.1			
	iOS 15.7			
	iOS 16.2			
3.	The app behaves as designed/desired on different screen resolution stats:		Selected based on the mobile screen resolution stats share worldwide dated 18 September 2023 (https://gs.statcounter.com/sc reen-resolution- stats/mobile/worldwide)	
	360 x 800			
	390 x 844			
	414 x 896			
	393 x 873			
	412 x 915			
	36 x 780			
4.	The app behaves as designed/desired on different types of iOS devices:		Selected based on the global top 10 best performing iOS devices in August 2023 (https://www.antutu.com/en/

	iPhone 14 Pro		
	iPhone 14 Pro Max		
	iPhone 14 Plus		
	iPhone 13 Pro Max		
	iPhone 13 Pro		
5.	The app behaves as designed/desired on different types of Android devices:	-	Selected based on the global top 10 best performing Android devices in August 2023 (https://www.antutu.com/en/ doc/130214.htm)
	Nubia Red Magic 8 Pro		,
	Asus ROG Phone 7		
	Xiaomi 13		
	Samsung Galaxy S 23+		
	Xiaomi 13 Pro		
6.	The app behaves as designed/desiredif		
<u> </u>	the device is tilted (landscape/portrait mode)		
	Interrup	ottesting	
7.	The app behaves as designed/desired if there is an incoming call		
8.	The app behaves as designed/desired if		
"	there is an outcoming call		
9.	The app behaves as designed/desired if		
9.	there is an incoming SMS		
10.	The app behaves as designed/desired if		
10.	there is an outcoming SMS		
11.	The app behaves as designed/desired if		
11.	there is an incoming MMS		
12.	The app behaves as designed/desired if		
12.	there is an outcoming MMS		
13.	The app behaves as designed/desired if		
13.	the charger is connected		
14.	The app behaves as designed/desiredif		
17.	the charger is disconnected		
15.	The app behaves as designed/desiredif		
13.	the USB cable is connected		
16.	The app behaves as designed/desiredif		
	the USB cable is disconnected		
17.	The app behaves as designed/desiredif		
, ,	the SD card is connected		
18.	The app behaves as designed/desiredif		
	the SD card is disconnected		
19.	The app behaves as designed/desiredif		
	the player is turned on		
20.	The app behaves as designed/desiredif		
	the player is turned off		
21.	The app behaves as designed/desiredif		
	the device goes to sleeping mode		
22.	The app behaves as designed/desiredif		
	the device resumes from sleeping mode		
23.	The app behaves as designed/desired if a local message is coming from another app (think of: calendar reminders, to-do task etc.)		
24.	The app behaves as designed/desiredifa		
	push message is coming from another app		
	(twittermentions,		

	whatsapp/Telegram/Viber/Facebook	
	message)	
25.	The app behaves as designed/desired if	
	the "Battery low" message is pushed	
26.	The app behaves as designed/desired if	
20.		
	external devices (headphones, Apple	
	Watch, etc.) are connected	
27.	The app behaves as designed/desired if	
	external devices (headphones, Apple	
	Watch, etc.) are disconnected	
28.	The app behaves as designed/desired if	
	the device resumes from lock screen	
- 00	The app behaves as designed/desired if	
29.		
	the sound on the device is turned off	
30.	The app behaves as designed/desired if	
	the device is in airplane mode	
	Connectiv	ity testing
31.	The app behaves as designed/desired if	
٠٠٠.	connected to the internet through Wi-Fi	
32.	The app behaves as designed/desiredif	
	connected to the internet through mobile	
L	data	
33.	The app behaves as designed/desired if	
	connected to the internet through	
	Personal Hotspot	
0.4	The app behaves as designed/desiredif	
34.		
	the app is out of network reach	
	NOTE: also test on point of break for Wi-	
	Fi and Personal Hotspot connection	
35.	The app resumes working when it gets	
	back into network reach from outside	
	reach of the network	
36.	Update transactions are processed	
30.		
	correctly after re-establishing connection	
37.	The app behaves as designed/desired	
	when the internet connection is off and	
	network connectivity is low	
38.	The app behaves as designed/desired	
	when the internet connection keeps	
	fluctuating	
20	The app still works correctly when	
39.	tethering or otherwise connected to	
	another device	
40.	The app behaves as designed/desired if	
	the app switches between networks (Wi-	
	Fi, 5G, 4G, 3G, 2G)	
	Security	testing
41	The app behaves as designed/desired if	
41.		
	permissions (access to	
	camera/microphone/gallery/etc.) are	
	used	
42.	If the app is stopped at an unexpected	
	time, user data should be saved locally	
	and available at start-up	
43.	The app has proper rules and mechanisms	
43.		
	in place to authenticate users on the	
	platform	
44.	User data (personal data and photos,	
L	passwords) are not transmitted in the	

	clear		
45	The confidential data of the user is not		
45.	accessible to other users on the platform		
46.	In the fields where an user enters a		
	password and confirms the password, the		
	data is hidden by asterisks		
47.	The app has a proper mechanism in place		
	to recover forgotten passwords		
48.	The deactivated users and users entering		
	old passwords are not allowed to log in		
49.	The app can fight against brute force		
.,	attacks, SQL injection attacks		
50.	Face identity or fingerprint verification		
50.	behaves as designed/desired		
	bona to as acoigned, aconed		
	Performan	nce testing	
	The app behaves as designed/desired		
51.			
	when the device is charging		
52.	The app behaves as designed/desired		
	when the battery is low		
53.	The app behaves as designed/desired the		
	battery is fully charged		
54.	The app behaves as designed/desired		
	when multiple users are logged in at the		
	same time		
55.	The app behaves as designed/desired		
	when the user tries to enter multiple		
	characters continuously		
56.	The app behaves as designed/desired		
	when the user tries to click on multiple		
	buttons/icons at the same time		
57.	The app behaves as designed/desired		
37.	when the user is in a moving condition i.e.		
	either in a vehicle or walking		
58.	The app behaves as designed/desired in		
50.	the event of a system crash or when the		
	app is stopped abruptly		
	The launch time of the app is as		
59.			
(0	designed/desired		
60.	The app behaves as designed/desired if it		
	is collapsed		
61.	The app behaves as designed/desiredifit		
	is expanded		
62.	The app limits or cleans the amount of		
	cached data		
		testing	
63.	The app behaves as designed/desired if		
	CPU is highly loaded		
64.	The app behaves as designed/desired in		
	case of out of memory		
65.	The app behaves as designed/desired in		
50.	case of low network bandwidth		
66.	The app can switch to different apps on		
00.	the device through multitasking as		
	designed/desired		
67			
67.	The app behaves as designed/desired if the device is shaken		
	the device is shaken	<u> </u>	<u> </u>
	0 17.	lity to ation	
		lity testing	
68.	A geo displays relevant location		

69.	Various payment methods (Google Pay, Apple Pay) can be applied		
70.	The app behaves as designed/desired		
70.	when using sensors (light, device		
	temperature, gyroscope, etc.)		
71.	The app connects correctly to the different		
	social networks (Twitter, Facebook, etc)		
72.	The app does not interfere with other apps		
	when in background/multitasking mode		
	(using GPS, playing music, etc.)		
	Update	testing	
73.	The app can be de-installed from the		
7.4	device The app behaves as designed/desired after		
74.	re-installation		
75.	The app can be found in the App		
, ,	store/Market Play? (to be checked after		
	go-live)		
	III/IIV	tostina	
76.	UI/UX The functionality of all the buttons or keys	testing	
70.	on the device are defined for this app		
77.	In case there's a true "home" button		
	available on the device, the home button		
	gets the user back to the home screen of		
78.	the device Most common gestures are available to		
/6.	control the app		
79.	The text on the app is visible and does not		
	cut off from the side		
80.	The popups, and alert notification appear		
01	correctly and at the right time		
81.	Navigation through the menu is seamless and swipe functions are working as		
	designed/desired		
82.	The page load duration: if the page takes a		
	longer time to load, there is a progress bar		
	that allows the user to get an idea about		
83.	the delay The company logo and image size are as		
03.	designed/desired		
84.	There is no any lag in the content while		
•	the user scrolls up and down		
85.	If the screen has editing option without		
	saving, there is the message with a popup		
	to save the details before shifting to another screen		
86.	The data does not get deleted pushing the		
	app to the background while carrying out		
	other function on the phone		
	Usabilit	vtesting	
87.	The design of the app is not dark so that	, tobting	
-,.	users cannot read the content		
88.	Navigational elements: a user does not get		
_	lost in the app		
89.	Gestures in the app correspond to a		
	standard meaning (example: swiping from top to bottom enables the notification		
	center)		

90.	It is possible for users to go back to a		
	previous screen for instance by adding a		
	back or cancel button		
91.	If there is a long list of data to scroll		
	through, there is a search option above		
	thelist		
92.	In case of 'live' filtering of data while the		
)	user enters his search query, it works as		
	designed/desired		
00	The appearance of buttons that perform		
93.	standard actions are not altered in the app		
	(for instance: refresh, organize, trash,		
	Reply, back, etc.)		
94.	Tapable elements have the right size and		
	are suitable to big fingers		
95.	Buttons locate in the same place of the		
	screen to avoid confusion		
96.	Buttons that have the same function have		
	the same color		
97.	Contextual menus are not overloaded		
98.	Help info is easily available		
99.	Keyboard adjusts to expected input (for		
	instance numbers/letters when expected)		
100.	Inactive buttons are clearly distinguished		
	from active buttons		
		nce testing	
	App Store Rev	iew Guidelines	
	(https://developer.apple.com/		guidelines/)
101.	The app does not include content that is		Ĭ
	offensive, insensitive, upsetting, intended		
	to disgust, in exceptionally poor taste, or		
	just plain creepy		
102.	The app with user-generated content or		
102.	social networking services includes:		
	A method for filtering objectionable		
	material from being posted to the app		
	A mechanism to report offensive content		
	and timely responses to concerns		
	The ability to block abusive users from the		
	- I		
	Service		
	Published contact information so users		
	can easily reach the app's contact person		<u> </u>
103.	Kids Category apps:		T
	There is no links out of the app,		
	purchasing opportunities, or other		
	distractions to kids unless reserved for a		
	designated area behind a parental gate		
	The app may not send personally		Exceptions may apply
	identifiable information or device		
	information to third parties		
104.	Medical apps:		
	The app clearly discloses data and		
	methodology to support accuracy claims		
	relating to health measurements		
	App reminds users to check with a doctor		
	in addition to using the app and before		
	making medical decisions		
105.	Drug dosage calculators:	1	1
100.	The app comes from the drug		
I			
I	manufacturer, a hospital, university,		

	health insurance company, pharmacy or	
	other approved entity, or receives	
	approval by the FDA or one of its	
	international counterparts	
	The app will be supported and updated	
	over the long term	
106		
106.	The app and its Support URL include an	
	easy way to contact the app's contact	
	person	
107.	The app implements appropriate security	
	measures to ensure proper handling of	
	user information collected pursuant to	
	the Apple Developer Program License	
	Agreement and the App Store Review	
	Guidelines and prevent its unauthorized	
	use, disclosure, or access by third parties	
108.	The app's functionality is clear	
109.	If the app includes in-app purchases, the	
	app description, screenshots, and	
	previews clearly indicate whether any	
	featured items, levels, subscriptions, etc.	
	require additional purchases	
110.	The app name is limited to 30 characters	
	Metadata such as app names, subtitles,	
111.		
	screenshots, and previews do not include	
	prices, terms, or descriptions that are not	
	specific to the metadata type	
112.	The app clearly describes new features	Simple bug fixes, security
	and product changes in their "What's	updates, and performance
	New" text	improvements may rely on a
	11011 10111	generic description, but more
		significant changes must be
		listed in the notes
	ml 'nl 'n l	
113.	The iPhone app runs on iPad	Wheneverpossible
114.	The app does not rapidly drain battery,	
	generate excessive heat, or put	
	unnecessary strain on device resources	
115.	The Apple TV app can be used without the	If a game controller is
	The Apple IV appeal be used without the	ii a game controller is

117. 118. 119. 120.	need for hardware inputs beyond the Siri remote or third-party game controllers The app never suggests or requires a restart of the device or modifications to system settings unrelated to the core functionality of the app The app requests explicit user consent and provides a clear visual and/or audible indication when recording, logging, or otherwise making a record of user activity The app that enables users to view and select files includes items from the Files app and the user's iCloud documents. The app does not contain empty ad banners or test advertisements Display advertising is limited to your main app binary, and is not included in extensions, App Clips, widgets, notifications, keyboards, watchOS apps, etc.	required, that is clearly

	that ad (without requiring the user to	
	leave the app), and is not engaged in	
	targeted or behavioral advertising based	
	on sensitive user data such as	
	health/medical data (e.g. from the	
	HealthKit APIs), school and classroom	
	data (e.g. from ClassKit), or from kids	
	(e.g. from apps in the Kids Category), etc.	
122.	Interstitial ads or ads that interrupt or	
	block the user experience clearly indicate	
	that they are an ad, do not manipulate or	
	trick users into tapping into them, and	
	provide easily accessible and visible	
	close/skip buttons large enough for	
	people to easily dismiss the ad	
123.	The app that contains ads includes the	
	ability for users to report any	
	inappropriate or age-inappropriate ads	
124.	App subscriptions work on all of the user's	
	devices where the app is available	
125.	The app works on its own without	
	requiring installation of another app to	
	function	
126.	If the app needs to download additional	
	resources in order to function on initial	
	launch, the size of the download is	
	disclosed and users are prompted before	
	doing so	
127.	The app that uses a third-party or social	
	login service (such as Facebook Login,	
	Google Sign-In, Sign in with Twitter, Sign	
	In with LinkedIn, Login with Amazon, or	
	WeChat Login) to set up or authenticate	
	the user's primary account with the app	
	also offers Sign in with Apple as an	
	equivalent option	
128.	The app includes a link to its privacy	
	policy in the App Store Connect metadata	
	field and within the app in an easily	
	accessible manner	
129.	The app that collects user or usage data	
	secures user consent for the collection,	
	even if such data is considered to be	
	anonymous at the time of or immediately	
	following collection. Paid functionality is	
	not dependent on or requires a user to	
	grant access to this data. The app also	
	provides the customer with an easily	
	accessible and understandable way to	
	withdraw consent. The purpose strings	
	clearly and completely describe use of the	
	data The arm requests assessed data relevant	
130.	The app requests access to data relevant	
	to the core functionality of the app and	
	only collects and uses data that is required	
101	to accomplish the relevant task	
131.	If the app supports account creation,	
100	account deletion within the app is offered	
132.	If the core app functionality is not related	
	to a specific social network (e.g. Facebook,	
	WeChat, Weibo, Twitter, etc.), access	
	without a login or via another mechanism	

	is provided		
133.	The app includes a mechanism to revoke		
133.	social network credentials and disable		
	data access between the app and social		
	network from within the app		
134.	The app only includes content that you		
134.	created or that you have a license to use		
	Apple Human Int	erface Guidelines	
	(https://developer.apple.com/des		ce-guidelines/)
Access		2-6/	ee gardenies, ,
	·		
135.	The app supports familiar, consistent interactions that make complex tasks		
	simple and straightforward to perform		
106	All app's content can be perceived		
136.	whether people are using sight, hearing,		
	or touch		
137.	The app supports personalization, i.e.		
13/.	when using standard components to		
	implement app, interface, text and		
	controls automatically adapt to several		
	accessibility settings, such as Bold Text,		
	Larger Text, Invert Colors, and Increase		
	Contrast		
Intera			
138.	The app supports gestures that target		
	system features		
139.	The app supports alternative ways to		
	perform gesture-based actions		
140.	App's core functionality is accessible		When possible
	through more than one type of physical		
	interaction		
141.	If custom gestures are defined, assistive		
	technologies that give people alternative		
	ways to interact with the app are supported		
142.	All controls and interactive elements have		
142.	a hit target that's large enough		
143.	A consistent style hierarchy is used to		
140.	communicate the relative importance of		
	buttons		
144.	The system-provided switch component is		
	preferred		
145.	A visual indicator in addition to color,		
	such as an underline, is given to links		
146.	Input information by speaking instead of		
	typing or gesturing is available		
147.	Siri or Shortcuts for performing important		
	tasks by voice alone are supported		
148.	Selecting plain text is allowed		When possible
149.	The system-defined haptics are supported		Where available
VoiceC			Ī
150.	Alternative descriptions are provided for		
	all images that convey meaning		
151.	Infographics are fully accessible. A concise		
	description of the infographic that		
1=0	explains what it conveys is provided		
152.	Images that are purely decorative and		
	aren't intended to communicate anything important, are hidden from assistive		
	technologies		
153.	Each page is given an unique title and is		
_1ეკ∙	Lacir page is given an unique title and is		

	provides headings that identify sections in	
	app's information hierarchy	
154.	Closed captions, audio descriptions, and	
	transcripts are provided for audio and	
	video content	
155.	VoiceOver users are able to navigate to	
	every element	
156.	The VoiceOver rotor is supported	When necessary
157.	The keyboard can be used to navigate and	
	interact with all components of the app	
Text di		
158.	App's layout is adapted to all font sizes	
159.	As font size increases, text truncation is	
	kept to a minimum	
160.	Layout is adjusted at large font sizes	
161.	The size of meaningful interface icons is	
	increased as font size increases	
162.	A consistent information hierarchy is	
	maintained regardless of the current font	
	size	D 1 M 1' 2 " 11
163.	Regular or heavy font weights is used in	Regular, Medium, Semibold,
	the app	or Bold font weights are
		preferred, because they are easier to see. Ultralight, Thin,
		and Light font weights, which
		can be more difficult to see,
		are avoided
164.	The app responds correctly and looks	ure a veraea
204.	good when bold text is turned on	
165.	Custom fonts are legible	
166.	Full text justification is avoided	
167.	Using italics or all caps for long passages	
,	of text is avoided	
Color a	and effects	
168.	If color to convey information is used, text	
	labels or glyph shapes are provided to	
	help everyone perceive it	
169.	Using color combinations as the only way	
	to distinguish between two states or	
	values are avoided	
170.	Views respond correctly to Invert Colors	
171.	The app's colors work well in both light	
35	and dark modes	
Motion		
172.	Tightened animations are played when	
170	Reduce Motion is on Autoplaying video or effects without also	
173.		
	providing a button or other way to control them is avoided	
1774	Using movement and blinking as the only	
174.	way to convey information is avoided	
Appice		
175.	If the app or game runs on more than one	
1/0	platform, similar images and color	
	palettes are used in all icons while	
	rendering them in the style that's	
	appropriate for each platform	
176.	The app icon is optimized for the specific	If applicable
	sizes the system displays in places like	FF
	Spotlight search results, Settings, and	
	notifications	

Color			
177.	The app's colors work well in both light and dark modes		
Google Play Core app quality (https://developer.android.com/docs/quality-guidelines/core-app-quality)			
Visual	experience		
178.	The app supports standard Back button		
,	navigation and does not make use of any		
	custom, on-screen "Back button" prompts		
179.	The app supports gesture navigation for		
1/9.	going back/ going to the home screen		
180.	The app correctly preserves and restores		
100.	user or app state		
101	**		
181.	The app preserves user or app state when		
	leaving the foreground and prevents		
	accidental data loss due to back-		
	navigation and other state changes		
182.	Notifications are not used for cross-		
	promotion or advertising another product		
183.	The app supports landscape and portrait		
	orientations and folded and unfolded		
	device states		
184.	App fills the app window in both		
104.	orientations and is not letterboxed		
	because of configuration changes,		
	including device folding and unfolding		
185.	The app correctly handles rapid		
	transitions between display orientations		
	and device folding and unfolding without		
	display rendering problems and without		
	losing state		
186.	The app displays graphics, text, images,		
	and other UI elements without noticeable		
	distortion, blurring, or pixelation		
187.	The app displays text and text blocks in an		
,	acceptable manner for each of the app's		
	supported languages:		
	Composition is acceptable in all supported		
	form factors		
	No cut-off letters or words are visible		
	No improper word wraps within buttons		
	or icons are visible		
	There is sufficient spacing between text		
0.0	and surrounding elements		
188.	The app's content, and all web contents		
	referred to by the app, support dark		
	theme		
189.	Touch targets are at least 48dp in size		
190.	The app's text and foreground content		
	should maintain a high enough color		
	contrast ratio with its background:		
	• 3.0:1 for large text / graphics		
	• 4.5:1 for small text (text smaller		
	than 18pt, or if the text is bold and		
	smallerthan 14pt)		
	·*		
Perform	nance and stability		
191.	The app does not crash or block the UI		
	thread causing ANR (Android Not		
	Responding") errors		

192.	The app loads quickly or provides	
	onscreen feedback to the user (a progress	
	indicator or similar cue) if the app takes	
	longer than two seconds to load	
193.	The app runs on the latest public version	
	of the Android platform without crashing	
	or severely impacting core functionality	
194.	The app properly supports the power	
	management features that were	
	introduced in Android 6.0 (Doze and App	
	Standby)	
Privac	y and security	<u></u>
195.	The app requests only the absolute	
	minimum number of permissions that it	
	needs to support its use case at hand	
196.	The app requests permission to access	
	sensitive data (such as SMS, Call Log,	
	or Location) or services that cost money	
	(such as Dialer or SMS) only when	
	directly related to the core use cases of the apps. Implications related to these	
	permissions should be prominently	
	disclosed to the user	
	disclosed to the user	
197.	The app requests runtime permissions in	
	context, when the functionality is	
	requested, rather than upfront during app	
	startup	
198.	The app clearly conveys why certain	
	permissions are needed or follow the	
	recommended flow to explain why it	
	needs a permission	
199.	The app should gracefully degrade when	
	users deny or revoke a permission. The	
	app should not prevent the user from accessing the app altogether	
200.	All sensitive data is stored in the app's	
200.	internal storage	
201.	No personal or sensitive user data is	
201.	logged to the system log or an app-specific	
	log	
202.	The app does not use any non-resettable	
	hardware IDs, such as the IMEI, for	
	identification purposes	
203.	The app provides hints to autofill account	
	credentials and other sensitive	
	information, such as credit card info,	
	physical address, and phone number	
204.	The app supports biometric	
	authentication to protect financial	
	transactions or sensitive information,	
	such as important user documents	
205.	The app listing includes a high-quality	
	feature graphic	
206.	The feature graphic does not contain	
	device images, screenshots, or small text	
	that will be illegible when scaled down	
	and displayed on the smallest screen size	
207	that your app is targeting The feature graphic does not resemble an	
207.	advertisement	
L	uu (CI LIBCIII CIII C	1

208.	The app's screenshots and videos do not	
200.	show or reference non-Android devices	
209.	The app's screenshots or videos do not	
	represent the content and experience of	
	your app in a misleading way	
Accessibility		
210.	The app's content is as legible as possible	
	(color contrast and text sizing to be	
	checked, components are visually	
	comprehensible and easy to discern from	
	each other)	
211.	Font size is specified in scalable pixels	
	(sp) and can be adjusted by users	
212.	The body size is not smaller than 12 sp	
213.	The contrast between background and	
	text is at least 4.5:1	
214.	A 3:1 ratio between surfaces and non-text	
	elements is used	
215.	More than one visual affordance is used	
	for actions like links	
216.	UI elements are described in app's code	Required for TalkBack
217.	Additional textual description of icons and	purposes
	images are provided	
218.	Decorative item descriptions are set to	
	null	
219.	UI granularity is considered and UI	
	elements are grouped to allow skipping	
	between blocks of actions and content	
220.	The app supports the Voice Access	
221.	The app supports the Switch Access	
Android app Material Design		
(https://m3.material.io)		
222.	App's elements are clearly visible	
223.	App elements' contrast and size are	
	sufficient	
224.	App elements' hierarchy of importance is	
	clear	
225.	Key information is discernable at a glance	
226.	Important actions are placed at the top or	
	bottom of the screen	
227.	Related items of a similar hierarchy are	
	placed next to each other
